Summary

Computer science graduate with a passion for technology and strong programming skills actively seeking opportunities. Proficient in JavaScript, TypeScript, and Python, with a keen interest in gaining practical experience and contributing to real-world projects in a collaborative, fast-paced environment. Demonstrates excellent problem-solving and communication abilities. Highly motivated to learn, grow, and make a valuable impact on the organization.

Technical Skills

Programming Languages

- Python
- TypeScript
- JavaScript

Tools, Frameworks & Databases

- Git
- NodeJS
- Flask
- ReactJS
- TailwindCSS
- Express
- MongoDB
- MySQL

Experience

AskInfoSec

Junior Frontend Developer

Bangkok, Thailand

August 2023 - October 2024

- Implemented various enhancement on the systems member's page:
 - Responsible for implementing a feature in the members module which sends out email notifications to invited members.
 - Responsible for implementing authorization on the said module which filters out users who can invite and remove members on the organization.
 - Created API endpoints and services for the specific use of member's page.
- Implemented various enhancement for the systems document's module:
 - Enhanced the UI for the documents module or page where there are several issues such as but not limited to improper table header alignment, missing action button and missing table data.
 - Responsible for implementing the edit document feature a user uploads a file.
 - Created API endpoints and services for specific use case of the page.
- Collaborating with the team to address front-end and backend potential issues.
 - Worked closely with my fellow developers, and CTO to address potential issues that may affect the system.
- Implemented several enhancements for the plans and pricing page:
 - Responsible for implementing a feature when a user has successfully bought a plan, they will be redirected to a specific page.
 - Fixed issues where card contents are not properly aligned.
- Integrated open-source software to our main product and improving our CICD Pipeline:
 - Responsible for integrating open-source software to our main product by using docker and github actions.
 - Worked on creating and improving our CICD pipeline for us to have a smooth utilization of the open-source software.
 - Handle our product versioning and releasing through implementation of third-party software or package.

Infinit – O

- Assist in preparation of instructional materials:
 - Collaborate with instructors in preparing materials such as handouts, presentations and lab assignments
 - Formatting documents, gathering reference materials
 - Conduct research for teaching materials.

Education

De LaSalle University – Dasmariñas, Philippines
BS Computer Science major in Intelligent Systems
2019 – 2023

Dean’s List 1st and 2nd Honors for multiple semesters.

Projects

DLSUD – SAMS

<https://github.com/R-esentful/dlsud-sams-react>

- A Capstone / Thesis Project based on the use of computer vision applied to a web application.
- Built using AWS RDS, AWS S3, Flask, ReactJS.

Portfolio

<https://github.com/R-esentful/portfolio>

- Built using NextJS, TailwindCSS, TypeScript, and ShadCN. A website to showcase my developed applications
- Utilize AWS S3 for file storage.
